THE CONSTITUTION OF
THE FRESH
DEMOCRATIC PARTY
PREAMBLE
The Fresh Democratic Party exists:

a) To build and safeguard a fair, free and open society, in which we seek to balance the fundamental values of liberty, equality and community, and in which no one shall be enslaved by poverty, ignorance of conformity.

b) To champion the freedom, dignity and well-being of individuals. We acknowledge and respect the right of every human being to freedom of conscience and their right to develop their talents to the full.

c) To spread and distribute power, to foster diversity and to nurture creativity. We believe that the role of the State is to enable all citizens to attain these ideals, to contribute fully to their communities and to take part in the decisions that affect their lives.

d) To build a nation in which all people share the same basic rights, in which they live together in peace and in which their diverse cultures will be able to develop freely.

We believe that at different periods a particular generation should be responsible for the fate of our country and, therefore each such generation must be given opportunity to fully play its role in the governance of the nation.

Upholding these values of individual and social justice, we reject all prejudice and discrimination based upon race, colour, religion, age, disability, sex and oppose all forms of entrenched privilege and inequality.

Recognizing that the quest for freedom and justice can never end we promote human rights and open government, a sustainable economy which serves genuine need, public services of the highest quality, international action based on the recognition of the interdependence of all the world’s people and responsible stewardship of the earth and its resources.
We believe that people should be involved in running their communities. We are determined to strengthen the democratic process and ensure that there is a just and representative system of government with effective legislative institutions, freedom of information, decisions taken at the lowest practicable level and a free and fair voting system for all elections.

We will at all times defend the right to speak, write, worship, associate and vote freely, and we will protect the rights of citizens to enjoy privacy in their own lives and homes.

We believe that sovereignty rests with the people and that authority in a democracy derives from the people. We therefore acknowledge their right to determine the form of government best suited to their needs and commit ourselves to the promotion of a democratic federal framework within which as much power as feasible is exercised by the regions of the nation. We similarly commit ourselves to the promotion of a flourishing system of democratic Local Government in which decisions are taken and services delivered at the most local level which is viable.

We will foster a strong and sustainable economy which encourages the necessary wealth creating process, develops and uses the skill of the people and works to the benefit of all, with a just distribution of the rewards of success. We want to see democracy, participation and the co-operative principle of industry and commerce within a competitive environment in which the State allows the market to operate freely where possible but intervene where necessary. We will promote scientific research and innovation and will harness technological change to human advantage.

We will work for a sense of partnership and community solidarity in all areas of life. We recognize that the independence of individuals is safeguarded by their personal ownership of property, but that the market alone does not distribute wealth or income fairly. We support the widest possible distribution of wealth and promote the rights of all citizens to social provision and cultural activity. We seek to make public services responsive to the people they serve, to encourage variety and innovation within them and to make them available on equal terms to all.
Our responsibility for justice and liberty cannot be confined by national boundaries; we are committed to fight poverty, oppression, hunger, ignorance, disease and aggression wherever they occur and to promote the free movement of ideas, people, goods and services.

Setting aside national sovereignty when necessary, we will work with other nations towards an equitable and peaceful international order and a durable system of common security. Within the African Union we affirm the values of federalism and integration and work for unity based on these principles.

We will contribute to the process of peace, the elimination of world poverty and the collective safeguarding of democracy by playing a full and constructive role in international organizations which share similar aims and objectives with us. These are the conditions of liberty and social justice which is the responsibility of each citizen and the duty of the State to protect and enlarge.

The FRESH Democratic Party consists of women and men working together for the achievement of these aims.
